Keyword Strategy Studio Pro Review Today I'm going to share with you my favorite software apps for the iPhone that you might not have heard about. They are software apps that I use everyday and that make my job and life much easier. They are all free and compatible with both the iPhone and iPod touch. In this review, I'll be going through my top 8 favorite apps that I think you will find useful as well. 1. "MyStampr" – This app is very interesting and useful. It enables you to create personalized business cards, website cards, and postage stamps. I like the fact that I can upload any photo that I like to use as a background to the cards that I make. It has a very user-friendly interface. 2. "Shazam" – Shazam is an app that allows you to identify music that you hear from the radio or television. It's a neat application and very useful. If you want to know what song is playing, you just have to press the button and it'll tell you. You can also connect to Internet radio stations and listen to their songs. 3. "Mail Checker" – With this app, you can check your email accounts from anywhere and at anytime. It has many features, including the ability to check emails using your voice. The interface is very easy to use and the application will always remember the last address that you checked. 4. "NetNew" – NetNew is a website finder. It allows you to search the web for specific websites. It has a list of popular websites and popular searches that you can choose from. In addition, you can also use it to search a specific topic and you can also be able to sort the results. 5. "WiFi Finder" – This app will help you to find your neighbor's or my
