For those experienced with collaborative editing, Share for Review enables a new way to take peer review to the next level. The ability to go back and forth between different versions of an editable, sharable, and collaborative file allows you to engage and review processes more than simply save and exit. Instead, you can make multiple iterations of an editable file to share back and forth. Nice Review but after upgrading to LR5.2 RC I think performance is better than with LR4. Working on a project with 1500 D800 NEFs my impression is that the smart previews increase speed while working in the Developer mode – in Lib. mode however everything slows because the JPEG previews are used. So far I am not sure how the Jpegs are used as previews when you have the smart previews (DNGs) available.
